R3.11 Multi-model UX review against A20 (preview build)

Review `R3.11-20261106-0903-d0bc0d` · 2026-11-06 09:03 UTC · build 40c1ce1 · preview (Harbourline demo), not production.

Reviewers (independent, same inputs): GPT-5.5 (`gpt-5.5`), Claude Opus 5.5 (`claude-opus-5-5`), Gemini 3.1 Pro (`gemini-3.1-pro-preview`), Claude Sonnet 5.5 (`claude-sonnet-5-5`)

Ranked fixes (priority = models proposing a fix × gap to 3.0)

1. Never exposes the engine — broker (priority 3.75: 3 model(s) × gap 1.25)

- GPT-5.5: Move build/registry/raw payloads into an optional diagnostics drawer restricted to operators.

- Claude Opus 5.5: Replace JSON payloads with templated event sentences linking to the matter.

- Claude Sonnet 5.5: Hide raw event payloads behind a details toggle and show human-readable summaries.

2. Aesthetic and minimalist design — broker (priority 1.5: 3 model(s) × gap 0.5)

- GPT-5.5: Redesign broker mobile as task cards rather than forcing desktop tables into the viewport.

- Claude Opus 5.5: Group alerts by client and severity with collapse, and summarise timeline payloads.

- Claude Sonnet 5.5: Add progressive disclosure to timeline, alerts and governance lists.

3. Consistency and standards — broker (priority 1.5: 3 model(s) × gap 0.5)

- GPT-5.5: Introduce a dedicated mobile broker layout using stacked rows with visible primary fields and overflow details.

- Claude Opus 5.5: Collapse the nav into a menu at narrow widths and switch tables to stacked cards.

- Claude Sonnet 5.5: Switch broker tables to responsive stacked cards at mobile widths.

4. Help and documentation — broker (priority 1.5: 3 model(s) × gap 0.5)

- GPT-5.5: Add inline playbooks/checklists for approvals, claims handling, renewals and operator governance.

- Claude Opus 5.5: Add hover or ? explanations for queue Class, Confidence and Route.

- Claude Sonnet 5.5: Add tooltips explaining queue classes and routes.

5. Help and documentation — client (priority 1.5: 3 model(s) × gap 0.5)

- GPT-5.5: Add contextual help panels explaining each flow, required information and what happens next.

- Claude Opus 5.5: Add inline 'What does this mean?' explanations on the policy page for excess, sum insured and agreed value.

- Claude Sonnet 5.5: Add inline plain-language explainers for excess, sum insured and agreed value.

6. Never exposes the engine — client (priority 1.5: 3 model(s) × gap 0.5)

- GPT-5.5: Gate all development, mocked and jurisdiction-preview elements behind an internal-only wrapper outside client review flows.

- Claude Opus 5.5: Map event types to human labels and hide internal identifiers.

- Claude Sonnet 5.5: Replace BROKER_REPLY labels and ids with friendly copy and hide dev panels from clients.

7. Error recognition and recovery — client (priority 0.66: 2 model(s) × gap 0.33)

- GPT-5.5: Show field-level errors, save drafts, and offer clear retry/contact-broker recovery after failed submissions.

- Claude Sonnet 5.5: Give lapsed renewal a contact-broker action with explanation and next step.

8. Consistency and standards — client (priority 0.5: 2 model(s) × gap 0.25)

- Claude Opus 5.5: Replace native selects with the design-system select and fix the duplicated mid-page banner.

- Claude Sonnet 5.5: Restyle claim form controls with the design-system components and fix the bottom bar overlap.

9. Error prevention — client (priority 0.5: 2 model(s) × gap 0.25)

- Claude Opus 5.5: Require a policy choice first and derive claim type from it, with no preselected peril.

- Claude Sonnet 5.5: Mark required fields and validate inline on the claim form.

10. Match to the real world — broker (priority 0.5: 2 model(s) × gap 0.25)

- Claude Opus 5.5: Render timeline events as broker-readable sentences, for example 'Renewal moved to Lapsed'.

- Claude Sonnet 5.5: Render timeline events as human-readable sentences instead of raw JSON.

11. Recognition over recall — broker (priority 0.5: 2 model(s) × gap 0.25)

- GPT-5.5: Replace raw event payloads with summarized human-readable activity rows and expandable technical detail.

- Claude Opus 5.5: Populate client name and owner on every queue and claims row.

12. Shows who holds my matter and by when — client (priority 0.5: 2 model(s) × gap 0.25)

- GPT-5.5: Add owner name, next step and due-by date to every attention item, claim and renewal card.

- Claude Opus 5.5: Show the named handler and an expected 'next update by' date on the tracker and renewal.

§3 Task matrix (measured at 390 px; consensus of 4 models)

- J1 Is the ute / unit / shed insured, for how much?: measured 1 tap(s), 2 screen change(s); goal screen reached: yes; stopped before any submit. Sequence: T-J1-0, T-J1-1

- J2 Get a certificate naming a counterparty: measured 3 tap(s), 3 screen change(s); goal screen reached: yes; stopped before any submit. Sequence: T-J2-0, T-J2-1, T-J2-2, T-J2-3

- J3 Lodge a claim for a specific thing: measured 2 tap(s), 2 screen change(s); goal screen reached: yes; stopped before any submit. Sequence: T-J3-0, T-J3-1, T-J3-2

- J4 See what I owe and how to pay: measured 1 tap(s), 2 screen change(s); goal screen reached: yes; stopped before any submit. Sequence: T-J4-0, T-J4-1

- J5 Confirm renewal details and sums insured: measured 1 tap(s), 2 screen change(s); goal screen reached: no; blocked at step 2: none of ['text=/renewal|Review renewal|Renew/i'] visible on /c/policy/00000000-0000-4000-8000-000000000104#v-DEF-456. Sequence: T-J5-0, T-J5-1

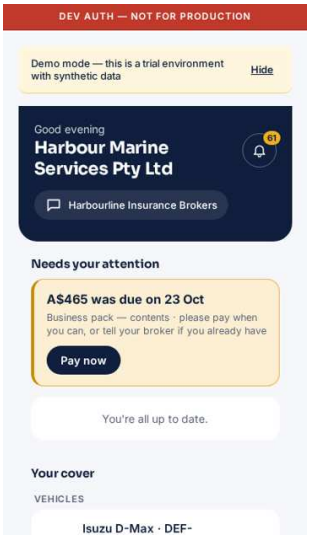

- J6 Let my spouse / bookkeeper act on this: measured 1 tap(s), 2 screen change(s); goal screen reached: no; blocked at step 2: none of ['text=/Add a person|Invite|Who can act|People/'] visible on /c/profile. Sequence: T-J6-0, T-J6-1

- J7 Find last year's schedule / PDS: measured 2 tap(s), 3 screen change(s); goal screen reached: no; blocked at step 3: none of ['text=/Schedule|PDS/'] visible on /c/documents. Sequence: T-J7-0, T-J7-1, T-J7-2

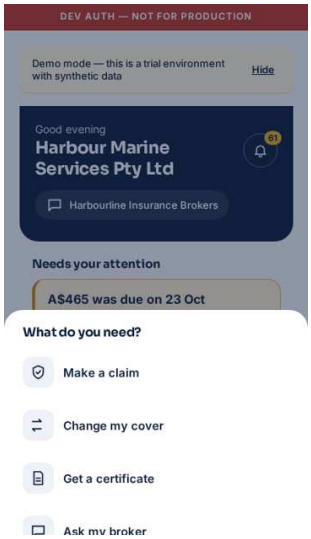

Job	Farmer (ute, shed, hay)	Landlord (2 units)	Tradie (ute, tools, PL)	Café owner (pack)	Household (2 Owners)	Professional (PI)
J1 Is the ute / unit / shed insured, for how much?	Y*	Y*	Y	Y	Y	n/a (A20)
J2 Get a certificate naming a counterparty	Y	Y	Y	Y	n/a (A20)	Y
