R3.14 Multi-model UX review against A20 (preview build)

Review `R3.14-20261106-1458-28a99e` · 2026-11-06 14:58 UTC · build 571d83a · preview (Harbourline demo), not production.

Reviewers (independent, same inputs): GPT-5.5 (`gpt-5.5`), Claude Opus 5.5 (`claude-opus-5-5`), Gemini 3.1 Pro (`gemini-3.1-pro-preview`), Claude Sonnet 5.5 (`claude-sonnet-5-5`)

Headline

Surface	GPT-5.5	Claude Opus 5.5	Gemini 3.1 Pro	Claude Sonnet 5.5	Consensus	A20 baseline	Rows ≥3.0
client	3.43	2.77	4	2.93	3.29	1.3	14/14
broker	3.31	2.69	4	3	3.25	1.1	11/13

Feature summary given to the reviewers

> brokAId is an AI-assisted insurance broker platform (Australia). Two surfaces: the client app (/c, mobile-first, bottom bar Home/Activity/+/Messages/Profile)

> and the broker app (/o: AE, Principal, Operator roles). Built features relevant here:

> - Client: Home with cover cards and attention items; policy detail (what is covered, sum insured, excess, period); Activity with payments due and Pay;

> + sheet (certificate, change cover, claim, documents); certificate of currency requests naming a holder; change-of-cover requests; claim lodgement;

> claim tracker with stages, "What we need from you", and a Repair quote card (repairer, total incl GST, View quote, fixed insurer disclaimer);

> Messages: broker thread and per-claim threads with photo/video attachments (metadata stripped) and broker PDF attachments (e.g. repair quotes);

> Profile, Documents, Notification settings, Security (password + authenticator); renewal review/accept; client roles incl. bookkeeper/contact.

> - Broker: AE inbox and claim Messages panel (reply with photos/PDFs, labelled files); Principal approval of advice-like replies including the exact files;

> queue/Today with endorsement approvals; client 360 view; renewal pipeline and review; claims list/detail with Documents (quote summary edit);

> Operator Governance: Release Check, kill switches, exposure report; Alerts settings with a push test card (device checklist, test send, per-device result).

> Added since the R3.11 review (R3.12–R3.13c):

> - Client: policy page always has a Renewal section (state + "Review my renewal" / "Tell us about changes before renewal"); Home shows a

> "renews in N days" card; renewal checklist asks to confirm sums insured and key values (changes become broker-reviewed requests).

> - Client: Profile → "People on this account": owner invites with presets (Bookkeeper, Co-owner, Read only, Custom), changes rights,

> removes people; 72h single-use invite + authenticator enrolment; "Copy invite link" when email is off.

> - Client: Documents library grouped per policy (current schedule, previous schedules, PDS & wording, certificates, receipts & signed

> acceptances, letters); "Ask your broker for a copy" when missing; "?" explainers (bottom sheet on phone, dialog on desktop) for

> insurance terms; "What happens next" panels on change, claim, pay and certificate.

> - Broker: plain-sentence timelines (no raw ids/JSON for AE/Principal; Operator-only Details); alerts grouped by client and severity;

> queue rows show client, what's needed, due by, Review, and a More toggle; Governance status cards with collapsible sections;

> staff help tooltips and "How this works" playbooks; phone menu and stacked tables at 390 px on every staff route;

> staff upload of policy schedules / PDS (PDF only, safety-checked, replace/withdraw, client notified); test data hidden from staff views.

> Not in scope of this evidence: anything not shown in the screenshots.

vs R3.11 (`R3.11-20261106-0903-d0bc0d`)

Consensus = mean of the 4 models; "no Gemini" = mean of the other 3.

Ranked fixes (priority = models proposing a fix × gap to 3.0)

1. Never exposes the engine — broker (priority 0.5: 2 model(s) × gap 0.25)

- GPT-5.5: Move all build, registry and TEST diagnostics behind an Operator-only details toggle.

- Claude Opus 5.5: Restrict classifier labels and internal ids to the Operator role.

2. Error recognition and recovery — broker (priority 0.5: 2 model(s) × gap 0.25)

- Claude Opus 5.5: Hide People for AEs, or show who to ask plus a back link.

- Claude Sonnet 5.5: Give permission-denied pages a next step (who to ask, back link) and give failures an actionable message.

§3 Task matrix (measured at 390 px; consensus of 4 models)

- J1 Is the ute / unit / shed insured, for how much?: measured 1 tap(s), 2 screen change(s); goal screen reached: yes; stopped before any submit. Sequence: T-J1-0, T-J1-1

- J2 Get a certificate naming a counterparty: measured 3 tap(s), 3 screen change(s); goal screen reached: yes; stopped before any submit. Sequence: T-J2-0, T-J2-1, T-J2-2, T-J2-3

- J3 Lodge a claim for a specific thing: measured 2 tap(s), 2 screen change(s); goal screen reached: yes; stopped before any submit. Sequence: T-J3-0, T-J3-1, T-J3-2

- J4 See what I owe and how to pay: measured 1 tap(s), 2 screen change(s); goal screen reached: yes; stopped before any submit. Sequence: T-J4-0, T-J4-1

- J5 Confirm renewal details and sums insured: measured 1 tap(s), 2 screen change(s); goal screen reached: yes; stopped before any submit. Sequence: T-J5-0, T-J5-1

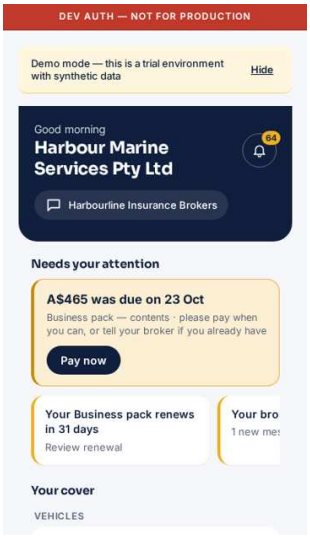

- J6 Let my spouse / bookkeeper act on this: measured 2 tap(s), 2 screen change(s); goal screen reached: yes; stopped before any submit. Sequence: T-J6-0, T-J6-1, T-J6-2

- J7 Find last year's schedule / PDS: measured 3 tap(s), 3 screen change(s); goal screen reached: yes; stopped before any submit. Sequence: T-J7-0, T-J7-1, T-J7-2, T-J7-3

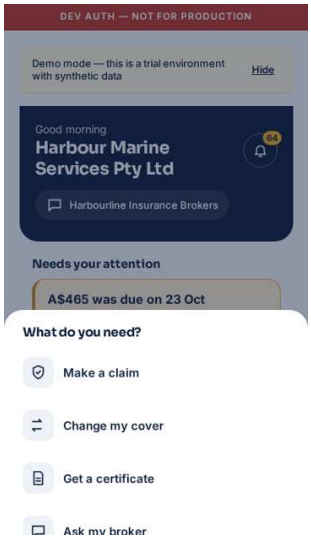

Job	Farmer (ute, shed, hay)	Landlord (2 units)	Tradie (ute, tools, PL)	Café owner (pack)	Household (2 Owners)	Professional (PI)
J1 Is the ute / unit / shed insured, for how much?	Y	Y*	Y	Y	Y*	n/a (A20)
J2 Get a certificate naming a counterparty	Y	Y	Y	Y	n/a (A20)	Y
